

# You Should've Been There

Marshall Crenshaw

You should've been there as the sun went down  
Colors ran all across the ground  
Then a thousand stars were spinning all around  
Do you care, you should've been there  
I saved you place right by my side  
And waited there in the candlelight  
But the only friend I had in sight was an empty chair  
You should've been there

Ran into some people we used to know  
They were going somewhere I didn't want to go  
So I kept on waiting for just a little bit more  
Not getting anywhere, you should've been there

Then I thought I saw you walking by into town  
Into the crowd I went chasing you down  
When I grabbed your arm, she spun around  
A stranger glared, you should've been there

You should've been there  
There's always so much to see in this old town  
Don't you agree  
But then again I never said I'd be anywhere  
You should've been there

I saved you a place right by my side  
And waited there in the candlelight  
But the only friend I had in sight was an empty chair  
You should've been there
