

Another Road

Mary Hopkin

Let's build another road, carve up the countryside
We've got the solution to all your problems
Make lots of money at the same time
Let's build another road

Oh, but it never occurs to stop and think it all out
And try to find a better way out
Oh, we live but we never learn

Let's build another town, carve up the countryside
We've got to find somewhere to put all the people
The next generation can work it all out
Let's build another town

Oh, but it never occurs to stop and think it all out
And try to find a better way out
Oh, we live but we never seem to learn

New age of understanding, the revolution has begun
But no matter what the changes, life, it goes on

Oh, no it never occurs to stop and think it all out
And try to find a better way out
Oh, we live but we never seem to learn

Let's build another dream, cos this one ain't working out
When all your plans turn into a nightmare
Little by little, try to turn it all about
Let's build another dream
