2. Its getting colder outside
Your rented space
They shadow box and they
Paper chase
It never stops
And we'll never learn
No hope without dope
The jobless return
The bankers have bailed
The mighty retreat
The pleasure it fails
At the end of the week
You take it or leave
Or what you receive
To what you receive
Is eternited leave

R: Its easy...

Incandescent light at doors
In adolescent menopause

In little clicks you got the music stops
The needle sticks and the penny drops
The summer's gone before you know
The muffled drums of relentless flow
You're looking at stars that give you Vertigo
The sun's still burning and dust will blow
Honey scars I'll keep you near
Our blood is gold nothing to fear
We killed the time and I love you dear
A kiss of wine we'll disappear
The last of the last particles
Divisible invisible
The last of the last particles
Divisible invisible
