

## God of Thunder

Master

The lack of the attention to detail  
Development was on a larger scale  
An agent to remove the worst disease  
The explosion brought the people to their knees

Where now, Where's the God of thunder and oppression  
Bow down to the leader and prepare for suppression

The victims almost never are prepared  
An ideology of all beware  
Insatiable the lust, the power, the greed  
Enthusiasm can't replace the need

Where now, Where's the God of thunder and oppression  
Bow down to the leader and prepare for suppression

Let's all form a line and stand up straight  
remember to salute me a smile upon your face  
I'll be your mother, father, I'll command your fate  
There's nothing to discover, we'll be the master race
