

True Color

Master

The fire burns inside the man made hell
It scorches victims often where they dwell
As blood flows through the streets, no one can tell
The power mongers dictate through a smell

With victims sacrificed, the leader's pacified
With victims sacrificed, the leader's pacified

No need to wonder why the obvious has shown true color

In silence so much pain is felt
The aftermath can leave such great results
As victims cry out all their names in vain
The past will soon repeat itself again

With victims sacrificed, the leaders pacified
With victims sacrificed, the leaders pacified

No need to wonder why the obvious has shown true color

It's time to break away, to put fear in its place
To conquer all divides and save so many lives
The suffering of mankind is self-induced
The fight for whom and what their so confused
No self-control but often so enthused
As chaos broadens violence will ensue

With victims sacrificed, the leader's pacified
With victims sacrificed, the leader's pacified

No need to wonder why the obvious has shown true color

The establishment has planned to garner all
Control to kill them where stand
The steps are all in place so you should be forewarned
It's time to devise a plan to escape now
