

# Bleeding Eyes

## Masterplan

Inside my camera is watching  
Memorizing my view of earth  
And stained is the eye  
Ambitions not where they should be  
Out of focus - too much fantasy  
Within hides the dreamer  
From the north to the desert sand  
Chaos disturbed the land  
And revelation was left behind us  
Lost without a cry  
A silent lullaby  
And I'm waiting - waiting for the healer  
I see with bleeding eyes  
I carry the world on my shoulders  
The load is heavy  
And it's time for an awakening  
The road is long - I've been told  
But I think it's short  
Time goes by - and I wonder how the world is taught  
From the streets of Babylon  
To the sound of a modern gun  
I know the story but it doesn't come clean  
I'm a superskittious man - fed the neon screen  
Riding on the rise of tomorrow  
Fading rainbow in the eyes of sorrow  
I've read the script - rehearsed the dream  
Faking death at the battle scene, yeah  
I wanna change it - I wanna change it  
I wanna change it - And rearrange it  
I wanna change it - I wanna change it  
I see with bleeding eyes  
I carry the world on my shoulders  
The load is heavy  
And it's time for an awakening  
The road is long - I've been told  
But I think it's short  
Time goes by - and I wonder how the world is taught  
From the streets of Babylon
