

No Name

Masturbace

Poisoning melody originaly unpleasant
so simple and very day's.
Who of us takes it in even when it's so loud
appealing and importunata and still not listened.

It's comfortable to ignore it
it's tones sounds everywhere
it's a raw abnormality
so hurting and wild
hateful in it's greatness.

It's growing everyday into enormous size
of creeping symphony so dark and wild.
Exposing itself to admire although stays still ignored
making faces and laughs so bitterly with na compromise.

Shout over orswitch it off?
We have to know it first
listen carefully
it will introduce itself.
