

# Radio

## Matchbox Twenty

Outside America  
Everybody's just waking up  
Drinking coffee from a paper cup  
To the sound of the radio

And there's a broke town girl  
In the parking lot  
Shaking off her dress with everything she's got  
Last night she started dancing and she couldn't stop  
Daylight came and it broke her heart

She's been up all night  
Dream so big  
In a town where dreams don't fit

Come on now people it's all we got  
We feel it in our hearts for sure  
Like a song that's been playing for all our lives  
We know it's right, we heard it on the radio

Outside in America  
There's a boy and there's a girl he loves  
But he never really gave enough  
So she couldn't take no more

She said she couldn't stay oh-oh  
She had to walk away  
'Cause she's never gonna get it  
Never gonna get it  
And she's never gonna live that way  
He says "Oh my God, I feel like hell"

Come on now people it's all we got  
We feel it in our hearts for sure  
Like a song that's been playing for all our lives  
We know it's right, we heard it on the radio

And its all these moments that  
Start all the fires that  
Make all these moments burn bright  
So how can all this be right

Come on now people it's all we got  
I feel it in my heart for sure  
Like a song that's been playing for all our lives  
We know it's right  
We heard it on the radio

Oh-oh

We know it's right  
'Cause we heard it on the radio  
We know it's right  
We heard it on the radio
