

Secret

Matt Costa

Treat it like a secret, keep it between us
Until we get too tired of holding on
The truth may try to seek it
Keep it, keep it, little secret

I can try to hide you
Disguise you and remind you to stay inside your little room
Deep down inside my pocket
The key that locks the locket to you, secret

So won't you say, your secret is safe
And won't you stay here with me today
My little secret
My little secret

A sound for your ears only, so don't tell anybody
A sight for only you to see
Well she's my little secret
Keep it, keep it, little secret

My little secret
My little secret
My little secret
