

## Copper Mine

Matt Pond PA

when it snows from above the towers  
the ground stays still - it can't get away  
clothe the roofs hour after hour  
with this ease ignore the obvious

heard the cold lost all its power  
if we go let's go away  
If we go let's go away

to rusted cars on blocks with no windows  
to union dam where signs all say slow  
to the copper mine where the blue water swallows  
to the bottom if nobody follows  
all year long the water stays cold
