

Love To Get Used

Matt Pond PA

In Athabasca, we set a fire
To the world we left far behind
All the faces put away
Lost lives explode into space

I got a message, I got a sign
Through the life we're swinging in time
So simple, it's like the sun
Shuts down on everyone

Black bird, from the blue
I give my love to get used
Our hopes come true
You give your love to get used

In Athabasca we lit a fire
To the path that led to our lives
Quit the faces we couldn't place
Ex-minds abilify space

I got a signal, I got a sign
From the trees we're swinging in time
So simple, it's like the sun
Shuts down on everyone

Black bird, from the blue
I give my love to get used
Our hopes come true
You give your love to get used

Let's hang on to abandon
Let's hope we lose control
To be out in the open baby
And let go of the rope
Nothing into nothing

Black bird, from the blue
I give my love to get used
Our hopes come true
You give your love to get used

I give my love to get used
You give your love to get used
