

Over

Mayer Hawthorne

I know that it's over
And the past is all behind
But when I'm not sober
Well you still run through my mind
I know it won't ever
Be the way it used to be
But can you come over
'Cause I need you here with me

We got along
We've got a long way to go
To get used to this
But we can take it slow
(Take it slow)
A little rust
Been a while for the both of us
I swear it's better now
Than it ever was

But it's all over
And the past is all behind
But when I'm not sober
Well you still run through my mind
I know it won't ever
Be the way it used to be
But can you come over
'Cause I need you here with me

Back when we were still together
You were never this brave
Italian looking glass
With the light pink wave
(Light pink wave)
And when I broke down in old town
You were tough
Hit me one more time
But one is never enough

I know that when I get up
I'ma feel like shit tomorrow
But I'll still call you up
Cause I can't let go
But I think I know

That it's all over
And the past is all behind
But when I'm not sober
Well you still run through my mind
I know it won't ever
Be the way it used to be
But can you come over
'Cause I need you here with me

Can you come over
Can you come
