

Take Me There

Mcfly

I don't ever wanna spend another day without you
Without you
I don't think that I'd be standin' here if I never found you
Never found you
Right now the sun is in your eyes
The moment has arrived, you see
Right now, there ain't no better time
I feel like you're alive to me

When you take me
When you take me
When you take me there
When you take me
When you take me
When you take me there

I get anxious just to know that you're the one I come home to
Come home to
Being without you makes me suffocate
Cause baby I breathe you
Yeah, I breathe you
Right now the sun is in your eyes
The moment has arrived, you see
Right now, there ain't no better time
I feel like you're alive to me

When you take me
When you take me
When you take me there
When you take me
When you take me
When you take me there

Right now the sun is in your eyes
The moment has arrived, you see
Right now, there ain't no better time
I feel like you're alive to me

I feel like somethin' is special here
But I feel like somethin' is special
I feel like somethin' is special here
But I feel like somethin' is special
With you

When you take me
When you take me
With you
When you take me there
With you
When you take me
When you take me
With you
When you take me there
With you
When you take me
When you take me
With you

When you take me there
With you
When you take me
When you take me
With you
When you take me there
With you

I feel like something is special here
But I feel like something is special
With you
I don't ever wanna spend another day without you
Without you
