

(Verse)

I've never been one to confide in life  
Now you find me heeding on advice  
You only get one shot, not to miss  
So bend and make it worth the risk  
Saddle up your dreams before you write them  
Spread your wings before you dye them

(Chorus)

I know it's never easy to find a thing to believe in  
But every opportunity that's usually would slip and pass you by  
When you feel put down, pick yourself up off the ground  
?  
You need to jump before you die to say you really lived it

(Verse 2)

? your step out of the line  
Scrape off the rust, wipe away the dust!  
And build a new design!  
You can strike gold or a silver lining  
Break the mold of the life you're defining

(Chorus)

I know it's never easy to find a thing to believe in  
But every opportunity that's usually would slip and pass you by  
When you feel put down, pick yourself up off the ground  
?  
You need to jump before you die to say you really lived it

(Bridge)

I'll settle up with my world ends  
I'll settle up with my world ends  
I'll settle up with my world ends  
Don't let the scars and marks  
And my bones will break ?  
I'll make sure you get past time  
You'll miss 100% of destruction never tried

(Outro: screaming)

Some things are meant destroyed!  
Open up your eyes!  
In the world of the right you must use your sign  
Some things are meant destroyed!  
Open up your eyes!  
In the world of the right you must use your sign
