

The optical feed manipulated  
The resolution only simulated  
A binary masterpiece between two realms

A quantum dance - mentally entranced  
You pray to yourself bearing the sign of a god  
Now you know who humans have prayed to all along  
Bound by your faith  
Instilled by your hate  
You deserve nothing more than this moment to pray

Matter becomes transparent  
Accepting the farce of human sentience  
Remain in a state of cognitive discord

Modulation through systematic control  
Grasping for air - increasing this data flow

Pineal glands stabilized  
Adrenal glands amplified  
I feel everything

A quantum dance - mentally entranced  
You pray to yourself bearing the sign of a god  
Now you know who humans have prayed to all along  
Bound by your faith  
Instilled by your hate  
You deserve nothing more than this moment to pray

Clawing at the ground  
Feel the texture of a nation  
Turned to ashes

Breathe the air of this fallen world once again  
Now your body will rejoin to repay the earth

Nervous system collapsing  
Optical implants refracting

This fleeting moment is nothing more than...

A quantum dance - mentally entranced  
You pray to yourself bearing the sign of a god  
Now you know who humans have prayed to all along  
Bound by your faith  
Instilled by your hate  
You deserve nothing more than this moment to pray
