

Holes

Meg & Dia

You were magic
I had a dirty mind
Stuck in static
You had a little time
That summer I
Fell for a drummer
And time was a ticker, a flicker
And no friend of mine
We would talk all night
Drinking gas station wine
So many quick sparks and false starts
But it's alright
We held on tight
In the dark with fingers crossed and heavy hearts
You said

We're all holes left in each other
We're lost souls tied up together
Burning like a dimming light
Yeah, we're searching for the other side
We're all holes left in each other
We're lost souls stuck here forever
When we gonna get it right
We'll be searching till the end of time
We were bold
We're gold
Now we're holes

When we were dancing
Felt I was 8 years old
Love notes on napkins
Wrapped in your winter coat
Then I lost you
The waves just tossed you
And you were a memory, I barely
Made it out alive
Lost half of me that night
I kept pieces of you
That were broken, I took as a token
And it's alright, see you tonight
In a dream, you'll be lying next to me
You'll say

We're all holes left in each other
We're lost souls tied up together
Burning like a dimming light
Yeah, we're searching for the other side
We're all holes left in each other
We're lost souls stuck here forever
When we gonna get it right
We'll be searching till the end of time
We were bold
We're gold
Now we're holes

If you find me will you let me go
You're a myth I made, you're a myth I felt

And I can't shake all the sadness all around me
I guess that I am a myth myself
I used to call you at half past twelve
Oh, how the time will race when you're by yourself
And if you find me will you let me go
You're I myth I made, I'm a myth myself

We're all holes left in each other
We're lost souls tied up together
Burning like a dimming light
Yeah, we're searching for the other side
We're all holes left in each other
We're lost souls stuck here forever
When we gonna get it right
We'll be searching till the end of time
We were bold
We're gold
Now we're holes
We were bold
We're gold
Now we're holes
