

# Every Little Thing

Melanie Doane

Every little thing I do  
Trickles down and lands on you  
I don't plan to get it wrong  
Maybe keep your raincoat on

Even just one small mistake  
Something ripples in the wake  
When I say you're face is so bright  
Makes me wanna do every little thing right

Every little thing right

Little things are hard to see  
They hide behind the family tree  
And their shadows dancing in the breeze  
And they change their way and look at me

Every little tiny face  
Holds the answer to this place  
Someone here might pray tonight  
'Cause I just wanna do every little thing right

Every little thing right

Every little thing right

(Every little thing I do  
Trickles down and lands on you)

Every little thing right  
(I don't plan to get it wrong  
Maybe keep your raincoat on)

Every little thing right  
Every little thing right...
