Deep Down Low

I visit my dreams In the mournin' of night And wake to half wishes And the fall of the flight I won't hide my hopes In my down pillow They'll become my river And up them I'll flow Right in broad daylight In front of your eyes My wishes are flowin' But I'm their disguise

(refrain:)
Over and over, think it slow
All things that grow
Need not be pretty
And don't have to show
We could be
Think it slow

Cause you got a secret for me That I know Not how to hang on to Or how to let go Can you keep me from drowning In my down pillow Oh! Please, I need help Cause my deep down is low

(repeat refrain once
