

Devil Comes Round

Men Without Hats

Well it was early in the morning, but it could have been late at night

I was lookin' for something I've been lookin' for all my life
Been so long never thought I'd see the day
Been so long took my breath away

When the sun goes down everybody lose control
That's when the devil come round said buddy I need your soul

Well the devil came down and he looked me in the eyes
He said son this should come as no surprise
When you shake that thing and you rattle it to the bone
You'd be best to leave well enough alone

When the sun goes down everybody lose control
That's when the devil come round said buddy I need your soul
When the world spins round everybody loses focus
That's when the devil come round said buddy I need your soul
Buddy I need your soul, Buddy I need your soul, Buddy I need your soul

I got a money in my pocket, got a suitcase in my hand
I got a one way ticket to forever land
Ain't no one here gonna tell me how I feel
I gotta pinch my self make sure that it's real

When the sun goes down everybody lose control
That's when the devil come round said buddy I need your soul
When the world spins round everybody loses focus
That's when the devil come round said buddy I need your soul
Buddy I need your soul, Buddy I need your soul, Buddy I need your soul
Buddy I need your soul
