## Graveyard

We watch this blackness eat away the cold blue sky Terrified, this is our last goodbye The dead will walk the streets tonight In my nightmare we never last this night

So fill your lungs this one last time Before I wake up to nothing Alone in the dark

Listen, you almost hear my laughing Watching as the world ends Lying in this six foot grave

So fill your lungs this one last time In my nightmare there is no place to hide This plague will take on everyone Even the sun rise won't save us from night's fateful cry

Listen, you almost hear my laughing Watching as the world ends Never thought it'd end this way Lightening, graveyard burning bright now Watching as the world ends Lying in this six foot grave There's vacant space

There's nothing left but my nightmares Ask you to stay, but it's dead here

Listen, you almost hear my laughing Watching as the world ends Never thought it'd end this way Lightening, graveyard burning bright now Watching as the world ends Lying in this six foot grave There's vacant space

Watch me laugh as the world dies
