

Tonight will last Forever

Mest

Remembering the night again
So cold outside, the snow began
That winter storm cut like a knife
Your eyes were wide enough to fill
The moon so full, it should've spilled
Chicago's skyline lit the night

Cut my nose, spite my face
Tonight will last forever
Take my life with your hands

I laid with you until the end
Watching the breathe crawl from your lungs
My alibi was lost that night
So take your last breathe in tonight
Let the frozen sky, surround your eyes
Chicago's skyline lit the night

Cut my nose, spite my face
Tonight will last forever
Take my life with your hands
