

Raise Your Fist

Metal Law

"Once upon a time on this battlefield
We're fighting for the metal
Destroying our enemies wherever they are
You better...
...Raise your fist into the air!"

Longing for the future, scream in pain
Desperation, all in sight
Reeling through the ruins,
one way street at night
You're wondering why, leading our way

Raise your fist before you close your eyes
Just one explosion in your head
Hand in hand we stand together,
proud and strong forever
I watch the dead, walking their way

Raise your fist into the air
Rising from hell, sacrifice the brave
Leather and spikes, unchain the night
Fire and passion, like never before

Never ending darkness, scream in pain
The writings on the wall
Stone cold, cold desperation, bad information
The last in line, leading your way

Raise your fist into the air...

We're fighting, freedom forever - Hail!
We're struggling, standing together
Looking for action, our will is untamed

Raise your fist into the air...
