

# We Have All The Time In The World

Michael Ball

We have all the time in the world  
Time enough for life to unfold  
All the precious things life has in store

And we got all the love in the world  
If that's all we have  
You will find, we need nothing more

Every step of the way will find us  
With the cares of the world far behind us

We have all the time in the world  
Just for love, nothing more, nothing less  
Only love

Every step of the way will find us  
With the cares of the world far behind us

We have all the time in the world  
Just for love, nothing more, nothing less  
Only love

Only love
