

# There's A Love

Michael Johnson

You don't ever have to change your world  
Cause I can fit right in, of that I'm sure  
And I won't ask too much of your privacy  
Cause there's a place in time for you and me

Just put your faith in me, we'll see it through  
Cause I just can't resist the things you make me do

(Chorus)

There's a love out there somewhere  
There's a love out there somewhere  
There's a love out there somewhere  
I can see yeah yeah  
A definite possibility for you and me

When you're feeling like nobody's needing you  
If things don't work out right the way you want them to  
I'll be there to understand your ups and downs  
Don't you ever worry cause I'll be around

Got my mind made up, made up on you  
And I'll be by your side whenever you want me to

Chorus

Just put your faith in me, we'll see it through  
And I'll be by your side whenever you want me to

Chorus
