

# The Calling

Michael Kiske

Well better it is when you can hold on to it  
When you keep the grip to push it higher

The further you get the more you use it up  
You got to look for news and you better do!

Give me something that'll do the driving  
I will take while driving's what we better do!

God send whispers, shining colour pictures go all  
through my head  
A new light shines over everything I ever knew and  
everything I did!

I hear you calling my name  
I hear you calling just the same

How could I know that I would get to see it  
When I keep the laws of all our fathers?

The more I pray the more they take control  
The more they bless my soul and I want 'em to!

Up to the stars that's where my soul is flying  
And I see that nothing else matters

With everything that my heart can take  
They gonna lift me up and I see the truth!

God send whispers, shining colour pictures go all  
through my head  
A new light shines over everything I ever knew and  
everything I did!

I hear you calling my name  
I hear you calling just the same

And I wanna fly so high when I die!

I hear you calling my name  
I hear you calling just the same

And I wanna fly so high when I die!
