

# Take Me Through The Night

The Michael Schenker Group

Going down the open road  
To find where I belong  
Can't resist the call is much too strong  
They're waking up the memories  
The shadows are on the wall  
Stirring up the mess inside my soul

We can get it together  
You can catch my fall  
I can take you higher  
Stand above it all

You can help me through these lonely days  
You can take me through the night  
You can help me past these lonely ways  
You can take me through the night

Take you through the emptiness  
And give you something real  
Make it past the loneliness you feel  
But I'm talking to the walls tonight  
I'm waiting by the phone  
Call before my heart has turned to stone

We can get it together  
You can catch my fall  
I can take you higher  
Stand above it all

You can help me through these lonely days  
You can take me through the night  
You can help me past these lonely ways  
You can take me through the night

When the black clouds come and steal the light  
You can take me through the night

I'm running through the open fields  
I'm lost inside a dream  
Drifting like a ship out on the sea  
And I'm reaching out with open arms  
I'm on the shifting sands  
Hoping I can find a second chance

We can get it together  
You can catch my fall  
I can take you higher  
Stand above it all

You can help me through these lonely days  
You can take me through the night  
You can help me past these lonely ways  
You can take me through the night

You can help me through these lonely days  
You can take me through the night  
You can help me past these lonely ways

You can take me through the night

You can help me

You can help me

You can take me through the night
