

The Dawn

Michelle Darkness

You can come with the dark But you can't go with the light I need
your little spark Before the darkness arrives

It seems all lost Waiting for the dawn My queen has arrived And
we have won

You embrace me with your arms You send my soul a light Hanging
out until' the dawn But the morning never hides

You have to save me before Your kingdom makes me feel strong Your
light shines over me so bright I need your darkening light
