

Pull

Microwave

I never wanted this...
Whatever I've got right now
I was waiting on it to get easier
I'm still waiting it out

You're pulling me back
You're pulling me back down
You're pulling me back down

You win
I can't
I can't do this again

If I ever get that bad
Take me out to a field and shoot me
If I ever get that bad
Take what you can; don't leave me with your hands empty

I know what you want, I know what you want
I'm not resistant, I'm speeding it up
The best days are when I know that it's over
The worst are when I hope that it's not

There's a footnote at the bottom of a page that no one reads
The last representation of what we used to be
We refuse to accept it but it fits us like a glove
You don't have to be happy to be loved
