Star Crossed

Star crossed and beautiful

Watch what you've become Both flower and gun You are unique You wild, wild heart See all you could be Growing high and free Forever lost You wild, wild heart

Star crossed and beautiful Stardust, untouchable

I live inside your eyes Form your truths and lies Part of my soul You wild, wild heart Near but we're worlds away Kills me every day This can't go on You wild, wild heart

Star crossed and beautiful Stardust, untouchable Star crossed and beautiful

Ancient and raw and fighting me Tied up in knots inside of me Where does it say it's easy No, we're not alone We're not alone We're not alone
