

# Black Out

Mike Stud

I got all my friends we were more like blood  
Pour the liquor till we drown  
Livin' all these nights like it's all we got  
Come to far to go home now  
No matter what we gon' find a way  
Swing from the pendulum till it break  
And the white flag up no were never down for the count  
And we will do it till the lights black out  
Do it till the lights black out

I used to dream about this kinda life  
Way back when I could sleep at night  
I'm talking way back Way before I came back  
Way before my boy was rockin' that jays hat  
Yeah  
Now we done made it this far we used to ride the a seller  
Bought a crib for the homies and we got one in the cellar  
Call up Chelsea to where handler  
I took a chance and I took advantage  
I brought my brethren to each and every second  
And we gon give em hell until we get up to heaven  
So this is for all the ones that I bring along  
Id rather be broke than be rich alone

I got all my friends we were more like blood  
Pour the liquor till we drown  
Livin' all these nights like it's all we got  
Come to far to go home now  
No matter what we gon' find a way  
Swing from the pendulum till it break  
And the white flag up no were never down for the count  
And we will do it till the lights black out  
Do it till the lights black out

Yeah  
I done came a long way

Long way from home  
Long days longer nights long way to go  
Broad day I drive the wrong way down the road  
Cause if I don't got a lane, then, I gotta make my own  
Try to be careful of who you keep around  
If they don't know your you roots gotta weed them out  
That make sense don't it?  
I count on all my people like the census  
That's the general consensus  
Yeah shits moving fast but I like this speed  
This don't feel like real life to me  
And when it gets dark then I like to speak  
My friends like my fam then they write with me

I got all my friends we were more like blood  
Pour the liquor till we drown  
Livin' all these nights like it's all we got  
Come to far to go home now  
No matter what we gon' find a way  
Swing from the pendulum till it break

And the white flag up no were never down for the count  
And we will do it till the lights black out  
Do it till the lights black out

Say, what you wanna say  
Run your mouth I will never take  
You, what I wanna do  
No one to know what I'm going through  
Say, what you wanna say  
Run your mouth I will never take  
You, what I wanna do  
No one to know what I'm going through  
Say, what you wanna say  
Run your mouth I will never take  
You, what I wanna do  
No one to know what I'm going through
