When you wanna
When you wanna wave like this
You gotta keep going
And when you, you're at rock bottom
You just gotta keep going
And if you're right in the middle
You just gotta keep going
Just blunt smoke halfway, but it's gotta keep going
You came twice tonight already, but I'm just going to keep going
Yeah

I've been doing way too well to sit around and wonder how
How it could have went different (Yeah)
I've been waiting all my life to live the one I'm living now
I'm the one that got to live it
So I went missing

Money in the mailbox, catalogue cabin
Mountain's in the background
Money in the mailbox, catalogue cabin (Yeah)

It's been a good year, I ain't tired of it
Been in Cali 7 damn years, now I'm tired of it
Way too much traffic and taxes, I'm tired of it
Way too much plastic, fuck that shit, I'm tired of it
Kissing on your lips and not recognize the feeling
Never force a vibe, that's the easy way to kill it
When I stole your heart, I ain't mean to be the villain
Had to rogue, go missing

How did that happen?
All hits no misses (Yeah)
How is that average?
Wear a lot of hats, wear a lot of hats
But I swear I'm not cappin'

I've been doing way too well to sit around and wonder how
How it could have went different
I've been waiting all my life to live the one I'm living now
I'm the one that got to live it
So I went missing

What would be your number one message? You know
What you've learned through all your experiences
Never give up, no matter what is happening to me in my life
I got up off the floor

And that would be the advice I would give to anybody
Don't give up
Don't fear change
