

Come Alive

Mikeschair

Standing still.
The world shuts down.
I can hear your voice much louder now.
You feel so close to where I am.
Like a river slowly rushing in.

You come alive and we're here together
Come alive and I know you never left
You're right here beside me.
Come alive in this very moment
Close my eyes and almost see your face.
I can feel you come alive.

The things you've done
The words you've said
How easier I just forget
I try to be so strong on my own
When I let my walls come crashing down, crashing down

Come alive and and we're here together
Come alive and I know you never left
You're right here beside me.
Come alive in this very moment
Close my eyes and almost see your face.
I can feel you come alive

When I need your love the most
You can hear me.
You can hear me.
Ooh I can feel you

Come alive and we're here together
Come alive and I know you never left
You're right here beside me.
Come alive in this very moment
Close my eyes and almost see your face.
I can feel you come alive

Standing still the world shuts down
