Hush now, let's not end before we start Hush now, lay a whisper on my heart

Time flies, when you're lying next to me Your eyes, are the only thing I see Let's make this moment last Try not to move too fast Just bring your lips to my ear

Don't say you love me,
Don't say you love me yeah
Don't say you need me,
Some things are better left unsaid
But if you feel the same, just whisper
whisper my name
If you feel the same, just whisper
My name

Time flies, when your body's close to mine Your eyes, sending shivers down my spine Let's make this moment last Try not to move too fast Just bring your lips to my ear

Hush now, let's not end before we start Hush now, lay a whisper on my heart

Don't say you love me,
Don't say you love me yeah
Don't say you need me,
Some things are better left unsaid
But if you feel the same, just whisper
Whisper my name
If you feel the same just whisper
My name

But if you feel the same, just whisper Whisper my name
If you feel the same, just whisper
My name
