

# Long Run

Milky Chance

I never wanted you to leave  
Though I see that this is just the way you feel  
I never wanted you to see  
Though I feel it's just a part of me

I never wanted us to lose our love when we fall apart  
But can we still make up?  
Can we still make up?

I bless the day, I like both  
I can't resist, I've never been close  
You go your way, I do the same  
And I can see you're a blossoming rose  
You get it done, you get someone who gives you some  
But I hope we can make up  
I hope we can make up

We're catching dreams on the long run  
We're catching dreams on the long run  
We're catching dreams on the long run  
Come with me, come with me

Blackout, fading all around  
I'm not sure if I can do it better now  
True that, this is too bad  
I'm trying see all the moments that we had  
Retrospect, it can drive you mad  
I don't wanna paint it black, 'cause I hope we can make up  
Why did we make up?

We're catching dreams on the long run  
We're catching dreams on the long run  
We're catching dreams on the long run  
Come with me, come with me

What if we can make up, make up yeah  
I hope we can make up, make up yeah  
What if we can make up, make up yeah  
I hope we can make up, make up yeah  
What if we can make up, make up yeah  
I hope we can make up, make up yeah

Oh yeah oh

We're catching dreams on the long run  
We're catching dreams on the long run  
We're catching dreams on the long run  
Come with me, come with me

I oh I yeah I oh I yeah
