

You Know I Love You Baby

Mindy Smith

Baby I think you may be drawn to drama
It's the only way to understand the things you do
I'm the one 'cause I could always calm a storm
As raging as a climate you're inclined to

You know I love you baby
I'd do anything for us
You know I love you baby
Come on, enough's enough

I don't mean to come off so impatient
I spend too much time begging you to stay
Baby you walk from every situation
God forbid just might not go your way

You know I love you baby
I'd do anything for us
You know I love you baby
But, come on, enough's enough

You do or you don't
You will or you won't
It's all or it's nothing
There's no more in-between

It's a little or a lot
We're something or we're not
It isn't or it is
I can't take much more of this

You know I love you baby
I'd do anything for you
I love you baby
Even with all you put me through
You know I love you baby
I'd do anything for us
You know I love you baby
But, come on, enough's enough
