How Could I Love You More

Minnie Riperton

My love is bigger than the sun How could I love you more Darling it can't be done My love is stronger than the tide How could I love you more No one could even try

You have sailed into my dreams
So many time
Calling me to fly away
And now I wake to romantic fantasies
The dream is real
And you are mine

I will love you till I die
Till the stars fall from the skies
Till the oceans all run dry
How could I love you more

My love is bouncing off the moon How could I love you more Darling we'll be there soon My love is softer than the rain How could I love you more How does a heart explain
