

City Of Night

Miracle Of Sound

Black spires in the city sky
They shimmer and shine tonight
Hacked wires and electric eyes
And a billion flashing lights

And I can wish myself away
Change the parts that bleed decay

I'm just a number riding solo in the code
Electric embers will ignite
I'm just another lonely nomad on the road
I'm a ghost in the city
I'm a ghost in the City Of Night

Tech dreams of organic toys
And I'm runnin' out on the edge
Soft screams of the rockerboys
Echoing through my head

Hounds and demons mechanized
Biotech behind our eyes

I'm just a number riding solo in the code
Electric embers will ignite
I'm just another lonely nomad on the road
I'm a ghost in the city
I'm a ghost in the City Of Night

Media manipulation
Silicone Psycho smile
Netrunner navigation
Breach and leech and file

I'm just a number riding solo in the code
Electric embers will ignite
I'm just another lonely nomad on the road
I'm a ghost in the city
I'm a ghost in the City Of Night

Now I'm runnin' out on the edge
Running out on the edge
I'm a ghost in the City Of Night
