Digital Shadow

Miracle Of Sound

Digital jungle
City of wind
Vigilant hunger
Burns within

Back into the batch
I sweep and scan
Hack into the patchwork
Pierce the plan

There is always some kind of way out of here...

Freedom is a green light
Won't back down
Freedom is a green light

Into the circuits I rush and I run
Every trace I erase
Out of the mainframe I'm coming undone
Headstrong I race through the maze

You can't catch a digital shadow
Deep into the city grid I go

Inter connected
Colors flash
Grid is infected
System crash

Back into the sprawl
No security
Hacking through the walls
Of your privacy

There is always some kind of way out of here...

Into the circuits I rush and I run
Every trace I erase
Out of the mainframe I'm coming undone
Headstrong I race through the maze

You can't catch a digital shadow
Deep into the city grid I go

Freedom is a red light
Won't back down
Freedom is a red light

Black Hat connection to the techno-social lie
Cyber metropolis my code to modify

Into the circuits I rush and I run
Every trace I erase
Out of the mainframe I'm coming undone
Headstrong I race through the maze

You can't catch a digital shadow

Deep into the city grid I go

Rush and I run
Coming undone

Deep into the city grid I go

Rush and I run
Coming undone
