

# Sun in Our Eyes

MØ

I feel the sunlight on my head  
The scent of summer in my bed  
When we were footprints in the sand  
Stealing liquor making plans

I can see your face from miles and miles away  
But heaven knows it's gonna fade  
Heaven know's it's gonna fade

I'm a dog searching for reasons and a way  
Back to your hands, you make me tremble, make me crash  
Forget my name

And just ride that wave until we're higher than life  
With the sun in our eyes  
Yeah just ride on that cloud until we fall from the sky  
No tears for the night  
For the night  
For the night  
Yeah, just ride that wave until we're higher than life  
With the sun in our eyes

They said to watch out for your kind  
I watched out and it blew my mind, yeah  
They say that romance makes you blind  
Well I'll be blinded for a life time

But I can see your face from miles and miles away  
And I remember every kiss  
And all the games you had me play

I'm a dog searching for answers and a way  
Back to your hands, you made me tremble, made me crash  
Forget my name

And just ride that wave until we're higher than life  
With the sun in our eyes  
And just ride on that cloud until we fall from the sky  
No tears for the night  
For the night  
For the night  
Yeah, just ride that wave until we're higher than life  
With the sun in our eyes

La la la la la la la la la  
La la la la la la la la la  
With the sun in your eyes (la la la la la la la la la)  
La la la la la la la la la

I can see your face from miles and miles away  
But heaven knows it's gonna fade  
Heaven know's it's gonna fade

I'm a dog searching for answers and a way  
Back to your hands, you make me tremble, make me crash  
Forget my name

And just ride that wave until we're higher than life  
With the sun in our eyes  
Yeah just ride on that cloud until we fall from the sky  
No tears for the night  
For the night  
For the night  
Yeah, just ride that wave until we're higher than life  
With the sun in our eyes
