Children Of The Flames

Mob Rules

Once more I'll be trying
To explane the whole scenery
Once more I'll be dying
By the rules of my destiny

Treated like rats in the gutter
And caught in a camp full of hate
The justice of life did not matter
The medical growth was our fate

See the fear in our faces
Hear the pain in our cries

I am a saint I am
I ain't no sin again
I am a saint I am
In the name of science
Children of the flames

We're born under signs of a wrong star
And forced on a trail straight to hell
We're punished by laws of injustice
It's more than a lifetime could tell

Smell the filth in our cages
We are the victims of a lie

The called us the children of fire
We're killed by the angel of death
The devil in black was a liar
And the chambers of gas my last breath

See the fear in our faces
Hear the pain in our cries

I am a saint I am
I ain't no sin again
I am a saint I am
In the name of science
Children of the flames

Once more I've been trying
To explane the whole scenery
Once more I was dying
By the rules of my destiny.
