Every day of my life since 11-2-74 on the street makin non-stop CREAM galore Packin heat, stickin up weed stores and more Collectin interest off of extortions to settle my score It gets deeper when things get real I'm down to stickin out West Bank for my mill And I'm from Hampstead, it's close to the shacks of Park South Well I'll be outside slingin, you're always high And don't come around to the crossroads of life We're to the death, you and me, this beef for eternity I'm goin out to the fullest extent So far into my troubles it's hard for me to get back to my everyday self and composure Catch you when you open then I bring you to a closure Put ice on a razor and freeze ya when ya shelter I went for ya grill but you dent from my ?rolder? I know this kid who says he knows ya because of that Now I know where ya lay ya hat at and that's that Say no more, I put it on you while you was yawning Murder without warning the very next morning

Once we step thru the door, party over, that's the endin
You and your crew'll leave out, a bunch of dead men
Bump me and I'll bump you back
You ain't tough black, niggas like you just get their life jacked
But I'ma cool nigga til you push me thru the limit
But try ta play me and ya ass I get up all in it
Don't try to cop please now son, it's dead and done
(I gave you fair warning) So run and get your guns
It's on, time to show em how I perform
My attitude'll transform, leave you dead plus wrong
Gettin the flow within, representin for Queens
Shit is real, why you hopin that it's all a dream
But you can't wake up, wettin a chest you bless
Chokin off your own blood, don't blame me you brought your own death
