

She's An Angel

Moe Bandy

That's not really her she's not herself tonight
Or she'd never let someone like you hold her so tight
She'll leave here like she came here very much alone
She's an angel she just left her wings at home.

She'll dance with you and drink with you
And listen to your lies
But she's not the kind you had in mind
That's only her disguise.

That's not really her she'd never be this loud
She's a good girl over acting there's one in every crowd
For your girl once was my girl before I did her wrong
She's an angel she just left her wings at home.

She's an angel she just left her wings at home...
