

Still I Won't Look Down

Moist

I can feel the earth
Turn beneath my feet
I can feel our bodies move in time
Walking through the crowd
No one makes a sound
Try to speak but no one's breathing out
Still I won't look down still I won't look down
All around the stars surround me
Still I won't look down still I won't look down
There's nothing there but air beneath me now
Drag myself to work
I know it's just a game
Pretend I'm just ghost in my life
And I can see you smile just behind the eyes
I know that you're falling with me now
Still I won't look down still I won't look down
All around the stars surround me
Still I won't look down still I won't look down
Nothing there but air beneath me now
Cold wind on my skin
Sunlight burns these eyes
I know that the hurt is on the way
Through this lucid dream
To this endless night
I know that you're falling with me now
Still I won't look down still I won't look down
All around the stars surround me
Still I won't look down still I won't look down
There's nothing there but air beneath me now
All through the dark
Bullets to speed
Always it's bringing you back to me
Blackness to light
Picking up speed
Still I won't look down still I won't look down
Nothing there but air beneath me now
