

I've been looking for a new kind of medicine  
I cut off my arms and handed you a cigarette  
I've been hoping that there's someone on the other end  
I've been holding onto to something that I'll never have

Generator, I've been waiting  
Come erase me, come erase me  
Generator, I've been waiting  
Come release me, come release me  
Come release me, come release me

I cut off my face and gave you everything I had  
I've been looking for a new kind of medicine

Generator, I've been waiting  
Come erase me, come erase me  
Generator, I've been waiting  
Come release me, come release me  
Generator, I've been waiting  
Come release me, come release me  
Come release me, come release me  
Come release me, come release me  
Come release me, come release me

(Release me  
Come release me)

Generator, I've been waiting  
Come release me, come release me  
Come release me, come release me
