Straight Ahead

Morcheeba

I've got questions for you You've got answers untrue I can walk these circles all night long Take a pill and sleep off Everything you can think of Walking all these circles to a song Could you play me something new?

So take a minute just to breathe And think of everything you wanted And what you got instead Is it a labor just to see Around the left, the right, over my head To straight ahead

Find a new way to feel right Between this time a fistfight I can read the circles 'round your eyes This is life, this is no rhyme Find a beat, find the right time To organize the circles to a song Could you play me something new?

So take a minute just to breathe And think of everything you wanted And what you got instead Is it a labor just to see Around the left, the right, over my head To straight ahead, yeah

So take a minute just to breathe And think of everything you wanted And what you got instead

So take a minute just to breathe And think of everything you wanted And what you got instead (what you got instead) Is it a labor just to see Around the left, the right, over my head To straight ahead, yeah
