

# To The Grave

Morcheeba

I wake up every day at dawn  
And life has come and gone  
And there's no other way home

I wake up every day at dawn  
And life has come and gone  
I can't face the scene that I have seen before

'Cause there's no other way home  
Been cut down to the bone  
And I still bear the scars  
I chose this path alone

I could never tell you about it all  
I'll take it to the grave for evermore (and more)  
Not a spark in the darkest night  
Not a sound from the deep dominion  
I'll take it to the grave for evermore (and more)

Straight to the grave  
Straight to the grave  
I'll bury all with me down in my grave

Straight to the grave  
Straight to the grave  
I'll bury all

Another day of rainfall  
With hailstones in the hall  
I've had to hold it down  
A melancholic storm

I got what it takes, it's toll  
A far from gentle stroll  
Forever freezing cold  
Or am I getting warm

I could never tell you about it all (all)  
I'll take it to the grave for evermore (and more)  
Not a spark in the darkest night  
Not a sound from the deep dominion  
I'll take it to the grave for evermore (and more)

I wake up every day at dawn  
And life has come and gone  
And there's no other way home

I wake up every day at dawn  
And life has come and gone  
And there's no other way home

I wake up every day at dawn  
And life has come and gone  
And there's no other way home

I wake up every day at dawn  
And life has come and gone

And there's no other way home

Been cut down to the bone
