

Heart Of A Child

Morgan Heritage

Heart of a child
We'd like to send this one to all the children in the world
From the shores of the Carribean to the jungles of South America
To the inner cities of North America
Across the oceans to Europe and Africa
And over to Asia

The heart of a child (heart of a child)
More precious than diamonds and pearls
Teach the children love and what it's worth

The heart of a child (heart of a child)
More precious than diamonds and pearls
Teach the children love and what it's worth

In teaching children about love
It starts with the words of the Lord
What better way to start when we know that God is love
We've got to reach for their souls
Save them from the troubles of the world
We can't give up
They look to us and this we've got to know
Innocent within their hearts are pure
And all they see us do they'll do for sure

We gotta be wise in all we do before their eyes cause they're not fools
Parents of tomorrow, children today
Oooh help us Lord I pray

The heart of a child (heart of a child)
More precious than diamonds and pearls
Teach the children love and what it's worth

The heart of a child (heart of a child)
More precious than diamonds and pearls
Teach the children love and what it's worth

When a child is young
It's the best time to learn
With their hearts clean and pure
Innocent to all that's wrong

Let's open all eyes and see
When they're young we gotta put in good seeds
So when they grow, the truth they'll know
And their hearts and their souls will be free

Innocent within their hearts are pure
And all they see us do they'll do for sure

We gotta be wise in all we do before their eyes cause they're not fools
Parents of tomorrow, children today
Oooh help us Lord I pray

The heart of a child (heart of a child)
More precious than diamonds and pearls
Teach the children love and what it's worth (heart is worth)

The heart of a child (heart of a child)
More precious than diamonds and pearls
Teach the children love and what it's worth (play for the children yeah)
The heart of a child
dadadadadadaa...
