

## Addict

Morgan Page

Can I be your star tonight  
You filled my soul with light, the day we met  
I don't wanna leave your side, no  
Have me by your side when our sun sets

I hope you still want me  
I hope you still need me  
A million years from now  
The seasons are changing  
The nights ever fading  
It's time we left our ground

Let's leave for an eternity  
We'll sail across the lights beyond the sky  
I'll be with you eternally  
And I look for your love it keeps me high  
And I look for your love it keeps me high  
And I look for your love it keeps me high

Can I be your star tonight  
You filled my soul with light, the day we met  
I don't wanna leave your side, no  
Have me by your side when our sun sets

I hope you still want me  
I hope you still need me  
A million years from now  
The seasons are changing  
The nights ever fading  
It's time we left our ground

Let's leave for an eternity  
We'll sail across the lights beyond the sky  
And I look for your love it keeps me high  
And I look for your love it keeps me high  
And I look for your love it keeps me high
