

Your Religion

Mr Hudson

Here in this lost boys' town we're starting over
Nothing to hold us back (I could open your mind)
I'm trying to find a way out of the sadness
Yeah I could be the one but you're caught up in the hype

On the tip of your tongue
Doing it while we're dumb
Is it ever enough? No no no
Rub this on your gums
It starts to feel numb
Are we having fun?

I'll be your religion
You know that I hear when you're calling out, calling out
Cos I'll be your religion
So put some faith in me

Seven day weekend's here, no turning back now
Swimming way too deep, you're always chasing the high
Never know what's wrong, you never know what's right
Can't tell I'm on your side, come out into the light

On the tip of your tongue
Doing it while we're young
Is it ever enough? No no no

I'll be your religion
You know that I hear when you're calling out, calling out
Cos I'll be your religion bae
So put some faith in me
I'm something to believe in
You know that I'm here in your darkest hour, hearing you
Cos I'll be your religion bae
As long as you believe in me

I'm giving it all to you
Showing you a way out
But like you always do
You're falling back into the crowd

I'm giving it all to you
I'm showing you a way out
But like you always do
You're falling back into the crowd

I'll be your religion
You know that I hear when you're calling out, calling out
Cos I'll be your religion bae
So put some faith in me
I'm something to believe in
You know that I'm here in your darkest hour, hearing you
Cos I'll be your religion bae
As long as you believe in me
