

Moonlight

Mustafa Sandal

Love is like the moonlight

Our love is like the moonlight
I never gonna leave you
Never break your heart
Love will surround you

Nobody'll find you in my heart
And in my dreams
I'll never let you go
Love will surround you

Nobody'll find you in my heart
And in my soul
I'll never let you go
Fly away
With every little touch from you
Away

Imagination takes you there
In my mind
And in my soul I'll be with you
My love
You're shining in my heart

Love is like the moonlight
And it's shining in my heart
Every thing will be right
As long as I'm here with you

Love is like the moonlight
And it's shining in my heart
Even through the darkest night
I'll be there with you
If you want you can embrace me

You can love and kiss and caress me
With your light on my skin
And the touch of your sense
I'm here for you to possess me
